PROFESSIONAL SUMMARY

Human-centred Product Designer with 5 years' experience delivering user-centered, high-impact digital products across fintech, Web3, HR, legal-tech, and consumer platforms. Strong in user research, design thinking, experimentation, and end-to-end product design—from discovery to high-fidelity UI and prototyping. Proven ability to translate complex business requirements into intuitive experiences, create and validate product concepts with users, and collaborate cross-functionally to achieve problem-solution fit. Adept at design strategy, storytelling, and building scalable design systems.

SKILLS

Design - UX/UI · Product Design · Interaction Design · Design Systems · Responsive / Mobile-First Design · Accessibility (WCAG) · Brand Design · Visual Design · Wireframing · Prototyping

Research - Usability Testing · User Interviews · Journey Mapping · A/B Testing · Prototype Testing · Insight Synthesis

Front-End & Web Basics: HTML · CSS · Responsive Layouts

Tools - Figma · FigJam · Framer · Descript · Canva · Affinity · Maze · Linear · Notion · ChatGPT · Sora · Loom

Media & Storytelling - Product Demo Videos · Explainer Videos · Scriptwriting · Content Design · Motion/Video Editing

Collaboration - Agile Teams · Product-Led Design · Developer Handoff · Stakeholder Communication

WORK EXPERIENCE

UX Designer, Replihaus Inc.

Creative and Collaborative Engine House | *USA* | *Remote* | *Apr 2026 – Now*

- Conducting end-to-end UX audits and user flow analysis for Replikit, a native template design tool, identifying usability breakdowns in stateful editor workflows
- Designing and maintaining a component-level design system for a creative tooling environment, balancing expressive flexibility with interface consistency across multiple product surfaces
- Collaborating directly with engineering on design specification, implementation review, and handoff — translating complex interaction models into implementable system behaviour

Lead UI/UX Designer, Lithium Digital Ltd.

Blockchain Infrastructure & Web3 Staking Platform | *Manchester, UK* | *Remote* | *Jul 2023 – Nov 2025*

- Collaborated with PMs and engineering teams to deliver accessible, responsive UI across web and mobile apps.
- Designed user flows, wireframes, and end-to-end UI for dashboards, admin tools, and multi-chain interfaces managing over \$5M in on-chain value.
- Delivered low-fi and high-fi prototypes for rapid iteration in collaboration with engineering and product strategy teams.
- Ran user testing sessions (Maze & live testing), synthesized insights, and translated findings into actionable improvements and new opportunity areas.
- Developed and maintained a multi-product design system, improving development speed and consistency across all product teams.
- Created brand assets, launch visuals, and demo/explainer videos that improved user onboarding clarity and stakeholder buy-in.
- Played a key role in fast-paced experimentation cycles, validating concepts quickly and contributing to product-market fit exploration.

Associate Product Designer, Vizable Labs Inc.

A product discovery platform that helps users explore and showcase digital products across Africa

Ontario, Canada | *Remote* | *Feb 2024 – May 2025*

- Led design across onboarding, authentication, and product-showcase experiences using Design Thinking and iterative prototyping.
- Conducted usability testing via Maze, evaluated results, and redesigned flows that led to +2,100 in-product interactions post-launch.
- Produced low-fi → high-fi prototypes for all major feature releases and collaborated closely with PMs and engineers to ensure

UX consistency throughout development.

- Built and documented a 50+ component design system supporting internal scaling and developer handoff.

User Experience Researcher (Assistant), Borderless

Health tech company exploring streamlining patients' data for easy access in Nigeria

Lagos, Nigeria | Remote | Apr 2023

- Conducted user interviews and synthesized insights to support product ideation
- Assisted in organizing research sessions, note-taking, and experience mapping, contributing to better design alignment and project clarity
- Collaborated with UX leads to inform feature prioritization and design decisions

Product Designer, Tabulera

Legal tech startup streamlining legal document workflows and services through digital solutions.

Lagos, Nigeria | Mar 2022 – Mar 2023

- Conducted discovery interviews with 30+ lawyers to map legal workflows and user needs.
- Designed task-based interfaces that reduced document drafting time by 10%.
- Delivered mobile-first layouts optimized for low-connectivity legal environments.
- Collaborated with engineering on specs, QA, and implementation.

Junior Product Designer, Digital Figures Solution.

Design and technology consultancy delivering client-focused digital solutions.

Ibadan, Nigeria | Jul 2021 – Feb 2022

- Collaborated on client projects to test and iterate on UX concepts
- Improved task completion speed by 40% via UX refinements and interaction optimization
- Supported the early launch of PostPaddy (2K+ active users) through responsive layout improvements and QA collaboration

EDUCATION

University of Ibadan

B.Eng., Mechanical Engineering (2023)

University of Minnesota (Google UX Design Certificate)

Design Thinking, Wireframing, Prototyping (2020)
